

## Unit 2 Day 20

## Inequality Applications Homework

**Directions:** Read through each word problem and identify an appropriate inequality to represent the situation. When asked, solve! Be sure to include a unit!

1. A friend texts you asking you to help him on his math assignment. The text reads, "Three times a number minus 6 is greater than 12... Can you help me write the inequality?"
  - a. If you let  $x$  represent the number, what inequality best models the info?

$$3x - 6 > 12$$

- b. Can you also help your friend solve the inequality and then graph?

$$\begin{array}{l} 3x - 6 > 12 \\ +6 \quad +6 \\ \hline 3x > 18 \end{array} \quad \rightarrow \quad \begin{array}{l} 3x > 18 \\ \frac{3}{3} \quad \frac{3}{3} \\ \hline x > 6 \end{array} \quad \boxed{x > 6} \quad \leftarrow \begin{array}{c} \text{arrow} \\ 6 \end{array}$$

2. Keith has \$500 in a savings account at the beginning of the summer. He wants to have at least \$200 in the account by the end of the summer. He *withdraws* \$25 each week for food, household items and gas.

- a. Write an inequality that represents Keith's situation.  $500 - 25w \geq 200$

- b. How many weeks can Keith withdraw \$25 from his account if he wants to have at least \$200 saved?

Flip sign!  $\rightarrow$   $500 - 25w \geq 200$

$$\begin{array}{r} -25w \geq -300 \\ \hline -25 \end{array} \quad w \leq 12$$

at most 12 weeks

## Unit 2 Day 20

## Inequality Applications Homework

**Directions:** Read through each word problem and identify an appropriate inequality to represent the situation. When asked, solve! Be sure to include a unit!

3. A friend texts you asking you to help him on his math assignment. The text reads, "Three times a number minus 6 is greater than 12... Can you help me write the inequality?"
  - a. If you let  $x$  represent the number, what inequality best models the info?

- b. Can you also help your friend solve the inequality and then graph?

4. Keith has \$500 in a savings account at the beginning of the summer. He wants to have at least \$200 in the account by the end of the summer. He *withdraws* \$25 each week for food, household items and gas.

- a. Write an inequality that represents Keith's situation.

- b. How many weeks can Keith withdraw \$25 from his account if he wants to have at least \$200 saved?

Review!

3.  $-x - 2 \leq 4x + 13$

$$\begin{array}{r} +x \quad +x \\ \hline -2 \leq 5x + 13 \\ -13 \quad -13 \\ \hline -15 \leq 5x \\ \frac{-15}{5} \quad \frac{5x}{5} \end{array}$$

$x \geq -3$

Inequality:  $x \geq -3$

Interval:  $[-3, \infty)$

4.  $-3x + 7 \geq -1(7 + 3x)$

$$\begin{array}{r} -3x + 7 \geq -7 - 3x \\ +3x \quad \quad +3x \\ \hline 7 \geq -7 \quad \text{true!} \\ \mathbb{R} \end{array}$$

Inequality:  $\mathbb{R}$

Interval:  $(-\infty, \infty)$

Review!

3.  $-x - 2 \leq 4x + 13$

Inequality:

Interval:

4.  $-3x + 7 \geq -1(7 + 3x)$

Inequality:

Interval:
